

DA150: Operative Dentistry Procedures and Manipulation of Dental Lab Materials

Credit Hours: 4

Clock Hours: 40/40/0

Students will be exposing and developing X-rays on live patients and identifying dental caries, restorations, periodontal disease and trauma on X-rays. There will be a group project and presentation on common errors and corrections on X-rays. They will learn matrices, dental dam placement and removal and step by step amalgam and composite procedures.

Prerequisites:
