

NDTP1214: NDT Pattern Recognition

Credit Hours: 2

Clock Hours: 20/30/0

In NDT Pattern Recognition, students will learn to recognize various EEG patterns seen during routine and advanced studies, including responses to activation procedures. Students will also recognize patterns at different machine settings. Students will supply clinical correlation to the disease process, patient's clinical presentation and the patterns displayed.

Prerequisites:

NDTP1100, NDTP1210, NDTP1400
